

## Products Features

VV PLUS VV PRO

Visually compares files and folders between floppy drives, hard drives, CD-ROM drives, zip drives, network drives (UNC paths supported) or any windows mapped drive, including USB drives and USB keys	✓	✓
Easily synchronize files and folders between floppy drives, hard drives, CD-ROM drives, zip drives, network drives (UNC paths supported) or any windows mapped drive, including USB drives and USB keys, <i>with the click of a button!</i>	✓	✓
Internet time synchronization	✓	✓
Supports multiple source/target folder pairs in the same project for One-to-One, One-to-Many, Many-to-Many File and Folder backup, synchronization or replication	✗	✓
Three ways to compare your files: Timestamp, CRC or Both	✓	✓
Synchronization methods supported	6	7
Optimized synchronization speed algorithm	✗	✓
Bidirectional synchronization	✗	✓
Previews all operations before synchronization	✓	✓
Synchronization logs will provide comprehensive Audit Trail and Error Reporting	✗	✓
Identifies conflicts, i.e.files that have changed both in source and target	✗	✓
File compression	✗	✓
File encryption	✗	✓
Optional administrative password to limit user access	✗	✓
Supports manual copy and delete operations for manual interactive synchronization	✓	✓
Extensive command line options	✓	✓
Seamless integration with the Windows Task Scheduler for easy synchronization scheduling, with VVScheduler. Runs on an interval "timed" basis	✗	✓
Synchronization projects saved to and loaded from text files with extension ".fsf"	✓	✓
Archives multiple versions of a file	✓	✓
Advanced Archiving Settings (e.g. Smart Archive, File Filtering, etc.)	✗	✓
Ability to copy files to a third location before synchronization (manual backup)	✓	✓
Links to an external program to visualize DETAILED differences between selected text files: txt, cpp, h, etc.	✓	✓

Run user-defined custom scripts before and after backup/synchronization		
Folder Snapshots		
Path Variables		
Synchronize most files even when is use by other programs (Open File Support)		
Processor Loading Support		
Copy File Security and Permission Attributes		
Allows you to set application priority to background or foreground		
Files can be included or excluded via extensive filtering capabilities		
Subfolders can be included or excluded via extensive filtering capabilities		
Support for international date format		
Runs as Service		
Safe copy feature prevents loss of data due to network interruption		
Can run in the background, you won't even notice its running, even when it doing a synchronization		
VVLogViewer application		
"Time Offset" options between source and target for synchronization between folders in different time zones		
Optional verification of all copy operations with automatic CRC calculation
