

VERITAS Storage Exec v5.3

JANUARY
2005

PRODUCT NAMES	NEW! Storage Exec v5.3 (Formerly StorageCentral)
PLATFORM	Windows 2003, 2000, XP, NT, Advanced Server and Datacenter
LANGUAGE	English
DATE AVAILABLE	January 18th 2005
PRODUCT DESCRIPTION	Storage Exec helps organizations maximize storage resources and reduce backup and restore times by providing automated storage management. Storage Exec enables real-time storage quotas for individual users, blocks non-business files such as MP3s and viruses from company servers and creates extensive, detailed storage reports. It reduces administration through email notification that lets users clean up their own files.
NEW FEATURES	<p>Integration with Backup Exec</p> <ul style="list-style-type: none"> Seamless integration with Backup Exec via Backup Exec SmartLink, enables users to immediately backup or archive data from Storage Exec reports using Backup Exec. <p>Information Desk-Based Administration Console</p> <ul style="list-style-type: none"> New overview page easily guides users through the task of setting up and configuring the software. This makes getting started faster and easier. <p>Microsoft Certification</p> <ul style="list-style-type: none"> Storage Exec is now fully Microsoft Windows Certified by Veritest <p>Easier Installation</p> <ul style="list-style-type: none"> Completely redesigned program makes Storage Exec easier than ever to install and configure. <p>Simplified Pricing and Licensing Structure</p> <ul style="list-style-type: none"> Storage Exec pricing structure has been dramatically simplified The new pricing model is similar to the Backup Exec model, featuring the core product (Storage Exec Server and Storage Exec Small Business Server) plus Options and Agents The pricing by tiers (according to the amount of storage) and by Operating System that was used in previous product versions has been eliminated. <p>Options and Agents</p> <ul style="list-style-type: none"> New, comprehensive add-on options and agents enable customers to enhance Storage Exec functionality. Options and agents include: <ul style="list-style-type: none"> Enterprise Administration Option Advanced Reporting Option Network Appliance Option Remote Server Agent Remote Workstation Agent (10-Pack)
